+1 (650) 484-9212 | nifong@ucsd.edu | linkedin.com/in/coleng | github.com/nclfng | nicolefong.tech

AI student at UC San Diego (GPA 3.70) with hands-on experience in computer vision, machine learning, and full-stack development.
Seeking AI Research & ML Engineer internships for Summer 2027.

EDUCATION

University of California, San Diego

Anticipated Graduation: June 2029

Bachelor of Science in Artificial Intelligence – Provost Honors, all quarters

GPA: 3.70

- **Relevant Coursework:** Intro to AI, Accelerated Java, Data Structures & Object-Oriented Design, Linear Algebra, Multivariable Calculus, Discrete Math, Math for Algorithms and Systems, Systems Programming & Software Tools

EXPERIENCE

Google Student Ambassador

August 2026 - Present

Google

San Diego, CA

- Serve as a campus representative for Google, connecting students with Google's tools, career resources, and programs.
- Plan and help run on-campus events and outreach initiatives to build awareness of Google's student programs

AI & ML Intern

June 2026 - Present

ChakraTech

San Diego, CA

- Developing and evaluating predictive models for sustainable materials research and polymer informatics.
- Building data pipelines and applying ML frameworks to optimization in developing biodegradable materials.

AI & ML Fellow

Mar. 2026 - Present

Break Through Tech

Cornell Tech, NY

- 1 of 4000 students selected nationally for Cornell Tech's AI/ML fellowship; industry ML project with corporate partner begins Fall 2026.

Operations Assistant

Jan. 2026 - Present

AI Stealth Company

San Francisco, CA

- Construct ground-truth evaluation baselines and rubric-based assessments for RLHF fine-tuning.

AI Events Board Director & AI Projects Mentor

Oct. 2025 - Present

Association for Computing Machinery (ACM)

San Diego, CA

- Direct AI event programming (workshops, panels, speakers) for UCSD's largest student organization and technical community.
- Mentor student teams on applied ML fundamentals including embedding spaces, similarity metrics, and CNN architectures.

Co-President

Oct. 2025 - Present

Triton Engineering Student Council (TESC)

San Diego, CA

- **Co-President (May 2026 - Present):** Elected Co-President leading the umbrella organization for 40+ UCSD engineering clubs.
- **Tech Committee (Oct. 2025 - May 2026):** Reduced manual data entry by 90% by building a Python-based scraper to automate engineering club data collection; manage technical event logistics and digital check-ins for 100+ attendees.

PROJECTS

DiamondHacks: Straightline | *Gaussian Splatting, BrowserUse API, Supabase, Python*

Apr. 2026

- Won 1st place (Best Use of Browser Use) among 400+ participants at DiamondHacks 2026.
- Built autonomous browser agents to audit ADA compliance across live web interfaces, structuring audit data into a Supabase cache layer.
- Designed the data contract feeding audit results into the team's 3D Gaussian Splatting frontend for immersive accessibility visualization.

Triton Robotics Autonomy Team Capstone | *ROS2, OpenCV, C++, Python*

Oct. 2025 - Mar. 2026

- Achieved 6-DoF pose estimation of armor targets by replacing bounding-box detection with feature-based keypoint matching, applying solvePnP over 2D-3D correspondences with measured object geometry.
- Prototyped the OpenCV contour-detection node in Python and integrated it into the team's ROS2 perception stack.

ACM AI Projects: Fruit Recognition Model | *PyTorch, YOLO, Python*

Oct. 2025 - Jan. 2026

- Trained a 24-layer GoogLeNet-inspired CNN in PyTorch on COCO 2017, implementing Inception modules and auxiliary classifiers from the original paper.
- Implemented IoU computation and a multi-part YOLO-style loss (localization, objectness, classification) from scratch rather than using library implementations.

TECHNICAL SKILLS

Programming Languages: Python, Java, TypeScript, Swift/SwiftUI, HTML/CSS, LaTeX

Computer Vision & Robotics: OpenCV, PyTorch, CNNs, YOLO, solvePnP, ROS2

Machine Learning & AI: Model Evaluation, RLHF, Recommender Systems

Web Development: React, Next.js, Supabase, Tailwind CSS, BeautifulSoup, BrowserUse API
